In the Claims

Please amend the claims as follows:

25 1. (Amended) Voice control system with a
 microphone array comprising a plurality of microphones
 for converting voice commands into electrical signals,
 and with a central speech recognition unit for converting
 these electrical signals into operational commands,

30 [characterized in that] wherein the microphones are
 distributed between different appliances which are
 connected to one another in such a way that the signals
 generated by the microphones can be transmitted to the
 central speech recognition unit.

35 2. (Amended) System according to Claim 1,
 [characterized in that] wherein the appliances are
 connected via a bidirectional network.

40 3. (Amended) System according to Claim 2,
 [characterized in that] wherein the bidirectional network
 is based on an IEEE 1394 bus.
